

4YCR Daily Health Check Services

“For less than the price of a cup of coffee, we’ll conduct a thorough check each and every morning before you start work. We’ll check:

Your backup is complete to make sure your data is safe

Your anti-virus pattern file to make sure your protection is always up-to-scratch

Your disk space to ensure your system won’t crash and your workers aren’t left unproductive while you recover

Your Exchange email system to make sure it doesn’t fill up and collapse leaving you floundering till it’s fixed

Your hard disk and memory health to ensure your system is always in peak operating condition

Your Critical Event Logs to spot other developing problems that could cause downtime during the day.

This service is performed automatically – so it’s guaranteed to happen even if staff are sick or on holiday. If we find problems, we’ll immediately alert an engineer so he can act fast to cut potential downtime. We’ll even send you a short note to confirm the checks carried out and their results.

And all this for less than the “cost of a coffee!”

4YCR 24x7 Monitoring

While the Start-of-Day service helps prevent big disasters, GFI MAX’s 24x7 checks will check other critical elements of your system every five minutes. We’ll know almost instantly about any problems including, or relating to:

- Operating system problems
- Remote office connectivity and network device problems
- ISP or Email problems
- Disk space problems
- Your website

We’ll know exactly when a problem occurs so we can respond promptly. We’ll spot the nature of the problem so we can fix it fast to keep you up and running.

For less than a cup of coffee a day you can backup your data and monitor you workstations. We also offer a simple pricing structure for servers.

Don’t wait until it’s too late.

nine Technology

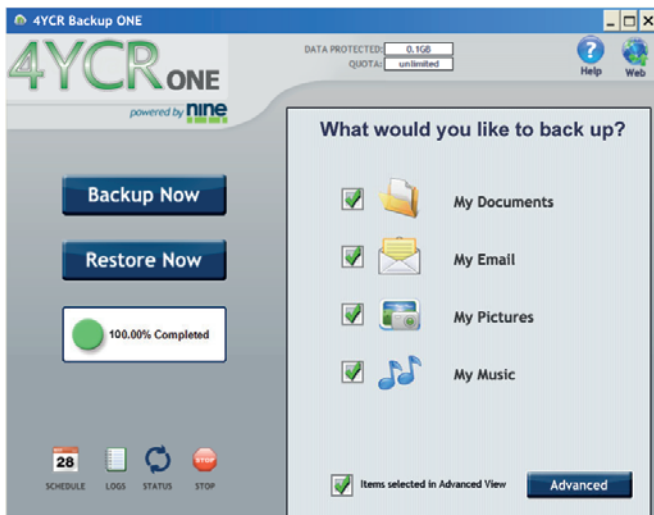

4YCR ONE

powered by **nine**

4YCR ONE is designed with the home user and small business in mind.

4YCR ONE allows you to back up your PC files, folders, and email easily through the intuitive interface.

By backing up your photos, music, and documents with 4YCR ONE you won't need to worry about losing your important data.

4YCR ONE makes backups easy through simple backup selections

What's the benefit of protecting files online? It's simple - all the data you have on your computer, from business files and folders to photos and videos to music collections can be lost in the blink of an eye. And without preventative measures, you might never see any of it again.

AUTOMATIC: Once the backup schedule is set, your information will be backed up automatically, meaning you don't need to worry about running your backups manually.

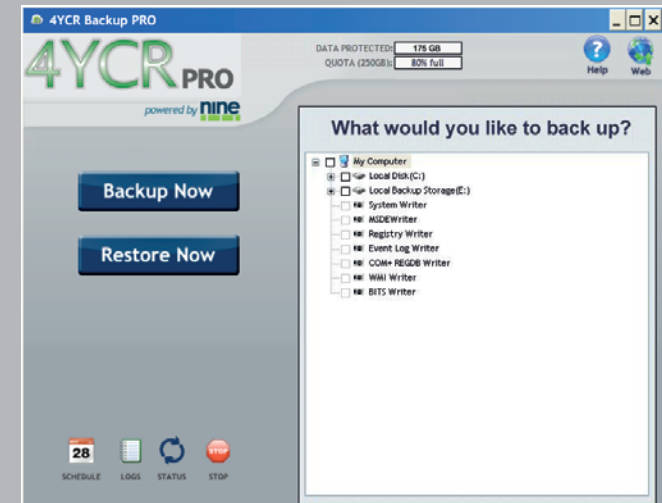

SECURE: Your information is encrypted with military grade encryption at all times. From transfer to storage and recovery you are the only one who can ever see your data.

OFF-SITE: You can rest assured knowing that your data is being stored off-site in a SAS-70 Type II data center.

AFFORDABLE: 4 Your Computer Repairs allows you to protect your important data at an affordable cost.

4YCR PRO

powered by **nine**

4YCR PRO offers expanded control of your backups

4YCR PRO is designed to protect your business from data loss by backing up your servers.

4YCR PRO offers support for SQL servers and Exchange servers while still maintaining a low cost per gigabyte protected.

For more information on this please contact 4 Your Computer Repairs.
